

Smart Business Insight Suite

Web-based modular toolkit

Smart Business Insight Suite

PwC Switzerland offers companies a toolkit specifically designed for the needs of multinational groups with decentralised tax and finance functions. All Smart Business Insight Suite modules are designed following a simple and lean design approach using state of the art web technology.

Your benefits

Our modular solution provides you with all the functionalities for your tax and finance function of the future!

- Cost-effective – low implementation and maintenance costs
- Light – quick to spin up projects
- User-friendly – easy to use and understand
- Modular solution – easily scalable
- Client-managed, i.e. no dependency on Provider once set-up

Smart Collaboration

A process management and document repository solution

Unknown filing deadlines, the struggle of finding the latest version of a document or missed emails are yesterday's news. PwC Smart Collaboration is a webbased tax process management tool. Use built-in functions such as customised workflows, standardised processes and possibility to separate responsibilities and set-up of reminders, document repository and much more – boosting work efficiency by facilitating challenging collaborations. Also includes the Operational Risk module to manage operational risks and controls.

Smart Survey

A questionnaire tool to collect non-system data

PwC Smart Survey allows to gain insights from entities across the globe in a collaborative manner. The tool enhances efficiency and effectiveness when gathering insights compared to traditional ways such as interviews. The solution uses the concept of social media platforms, combined with strict access management. The ability to set up individualised surveys by offering a wide range of question types and decision trees, guarantees a successful fact or structured information-gathering.

Smart Tax Risks & Controls (TRaC)

A tax riskmanagement and tracking solution

The web-based risk management tool provides management functions with a simple and operational approach to manage tax risks and opportunities with clear visualisations. This further allows to use this data for reports to relevant stakeholders and to prioritise mitigation and resources in an increasingly complex environment.
